

The first things you will need to do:

- 1. Decide on a tribe name**
- 2. Read the description of your region**
- 3. Carefully and thoughtfully choose the place within your region where your tribe will settle and mark it with a dot on your U.S. map**

The environment in a cultural region drastically affects the way people live. People have to adapt in order to survive! Just as actual Native American tribes did in the past, you will need to rely upon the natural resources in your region's environment in order to create shelter, clothes, and tools. In addition to these three items, your tribe will also need food to live. Remember, you are competing against the other tribes...ONLY ONE tribe will "survive" and win the million dollar prize! Will you be the tribe with the best adaptations? Will you collect the \$\$\$?

You'll have 2 days to create/design:

- shelter**
- clothes**
- tools**

and don't forget -

- food**
- **You will be judged using the scoring sheet on the following page.****

	1	2	3	4
Shelter	Did not use natural resources effectively	Used natural resources effectively	Used natural resources effectively and creatively	Used natural resources effectively and creatively Innovative design
Clothes	Did not use natural resources	Used natural resources effectively	Used natural resources effectively and creatively	Used natural resources effectively and creatively Innovative design
Tools	Did not use natural resources effectively	Used natural resources effectively	Used natural resources effectively and creatively	Used natural resources effectively and creatively Innovative design
Food	Did not use natural resources effectively	Used natural resources effectively	Used natural resources effectively and creatively	Used natural resources effectively and creatively Innovative design
Overall Adaptation	Did not use description of region and map to aid in adaptations	Tried to use description of region and map to aid in adaptations	Effectively used description of region and map to aid in adaptations	Effectively used description of region and map to aid in adaptations Evidence of logical and thoughtful reasoning and strategizing
